

Taxonomic Characterisation of Flowering Plant Species

Vir Jee

Taxonomy is defined as that branch of science which deals with the identification, nomenclature and classification of biological (living) organisms on the basis of their similarities and differences. Etymologically, Taxonomy owes its origin to two Greek words – “*Taxis*” = arrangement and “*nomos*” = rules or laws i.e. arrangement as per rules or laws. It serves as the pedestal for entire biology and hence can be considered as the mother of all biological sciences. Even in our daily life, a man behaves as a taxonomist while identifying and naming a particular food to eat; a beverage to drink or clothes to wear, etc. Identification of a particular biological entity is, therefore, a fundamental pre-requisite for carrying out any further study or research in it. However, identification is inconceivable without a proper system of nomenclature.

Any object known to human intelligence must possess a name for describing and communicating ideas about it in order to ascertain its relationships. There are two types of names which have been assigned to biological objects since ancient times – the common or vernacular (local) names and the scientific name. The former have been handed down from generation to generation and are derived from regional or native languages of a particular country. For example ‘seib’ and ‘kutta’ (vernacular Hindi names) of India are known as ‘apple’ and ‘dog’ in USA, respectively. Moreover, widely distributed

organisms bear a large number of common names. In India alone, a large number of local names exist due to the multi - linguistic nature of its people. Thus vernacular names are neither methodical nor universal and could prove quite misleading in their application. To overcome such limitations, every known biological species is given a legitimate scientific name based on universally accepted International code of binomial system formalized first in mid- 18th century by Carolus Linnaeus, the father of Taxonomy. According to this binomial system, the first name implies name of the ‘genus’ (a substantive noun) and the second as ‘specific epithet’ (an adjective or noun). Thus *Homo sapiens* and *Mangifera indica* represent scientific name of man and mango in which *Homo* and *Mangifera* indicate generic names where as *sapiens* and *indica* imply their specific epithets respectively. In actual practice all the rules of International code of Biological nomenclature are followed for providing a scientific name to a biological species which is, however, a technical discourse.

A biological species represents the basic unit of taxonomy and is defined as a group of closely related individuals which are morphologically similar, genetically distinct and reproductively isolated. Many workers consider Taxonomy as synonymous with Systematics; the latter, however, leans more upon phylogenetic (evolutionary) considerations. More recently, a new code known as ‘phylocode’ based on phylogeny (ancestry and descent) has been proposed for naming organisms. However, it is yet to replace the conventional code in view of its inherent queries and criticism. Although taxonomic analysis is applicable to every living organism yet its treatment in the present context has been limited to the world of plants particularly flowering plants comprising about 2,45,000 species throughout the world. A few sources for designating the specific epithets of some of these plants are outlined on next page:

Taxonomic Characterisation of Flowering Plant Species- Vir Jee

Table 1. Taxonomic Characterisation of specific epithets in some flowering plants

Character/ Choice	Specific epithet	Scientific Name	English name	Vernacular Name/s
a. Nativity				
		i. Continent:		
Asia	<i>asiatica</i>	<i>Centella asiatica</i>	Asiatic Penny wort	Brahmi Bhuti (D)
Europe	<i>europaea</i>	<i>Cuscuta europaea</i>	Large Dodder	Wazul Kukli poat (K)
Africa	<i>africana</i>	<i>Kigelia africana</i>	African sausage tree	Kakdi (D)
Australia	<i>australis</i>	<i>Celtis australis</i>	Hackberry	Brimij (K)
		ii. Country:		
India	<i>Indica</i>	<i>Aesculus indica</i>	Horse chestnut	Han Doon (K)
	<i>indicum</i>	<i>Nerium indicum</i>	Red Oleander	Gandela (D)
China	<i>chinensis /</i> <i>sinensis</i>	<i>Ixora chinensis</i>	Chinese Ixora	Van Jwala (D)
Japan	<i>japonica</i>	<i>Hibiscus rosa-sinensis</i>	China rose	Gudhal (D)
Philippines	<i>philippensis</i>	<i>Mallotus philippensis</i>	Japanese honey suckle	Madhu sondhi (D)
Nepal	<i>nepalense /</i> <i>nepalensis</i>	<i>Geranium epalense</i>	Monkey face tree	Kamila (D), Kaimbil (K)
Tibet	<i>tibeticum /</i> <i>tibetica</i>	<i>Rumex nepalensis</i>	Nepal Geranium	Bhanda (D)
Sri Lanka / Ceylon	<i>zeylanicum</i>	<i>Tanacetum tibeticum</i>	Broad leaved Dock	Abuj (K), Aarbal (D)
Italy	<i>italica</i>	<i>Arabis tibetica</i>	Tansy	Khamchu (L)
Canada	<i>canadensis</i>	<i>Cinnamomum zeylanicum</i>	Tibetan Rock-cress	---
America	<i>americana</i>	<i>Setaria italica</i>	Cinnamon	Dalcheen (K)
Germany	<i>germanica</i>	<i>Iris germanica</i>	Indian millet / Foxtail millet	Shola (K), Kangni (D)
Mexico	<i>mexicana</i>	<i>Argemone mexicana</i>	German Iris	Mazar bhuti (D)
Canada	<i>canadensis</i>	<i>Solidago canadensis</i>	Mexican prickly poppy	Peeli Kandyari (D)
America	<i>americana</i>	<i>Agave americana</i>	Golden Rod	Sondandi (D)
			Century Plant	Kaoida (D)
		iii. State:		
Mysore	<i>mysorensis</i>	<i>Thunbergia mysorensis</i>	Mysore Clock vine	----
Bengal	<i>benghalensis</i>	<i>Ficus benghalensis</i>	Banyan tree	Bargat / Bardh (D)
Sikkim	<i>sikkimensis</i>	<i>Corydalis sikkimensis</i>	----	----
		iv. Province:		
Kashmir	<i>kashmiriana /</i>	<i>Iris kashmiriana</i>	Kashmir Iris	Mazar Mund, Sossan (K)
Ladakh	<i>kashmirianum</i> <i>ladakense</i>	<i>Fagopyru kashmirianum</i> <i>Taraxacum ladakense</i>	Kashmir Buckwheat Dandelion	Troumba (K) ----
		v. Locality:		
Zanaskar	<i>zanaskarensis</i>	<i>Astragalus zanaskarensis</i>	Milk Vetch	Deyanko (L)
Bannihal	<i>bannehalensis</i>	<i>Artemisia bannehalensis</i>	Worm wood	Banahali Tschimber (D)
Kishtwar	<i>kishtwariense</i>	<i>Geranium kishtwariense</i>	Cranes bill	----
Pahalgam	<i>pahalgamensis</i>	<i>Impatiens pahalgamensis</i>	Balsam	----
		b. Mountain Range		
Alpine region	<i>alpinum /</i> <i>alpina</i>	<i>Thalictrum alpinum</i>	Alpine Meadow rue	Dharu Bini (D)
Altai	<i>altavicum /</i> <i>altaica</i>	<i>Arabis alpina</i>	Alpine Rock- cress	----
Pamir	<i>pamirica</i>	<i>Callianthemum altovicum</i>	Callianthemum	----
Tian Shan	<i>tianshanica</i>	<i>Draba altaica</i>	Whitlow grass	----
Caucasus	<i>caucasica</i>	<i>Atriplex pamirica</i>	Orach	----
Pyrenees	<i>pyrenaicum</i>	<i>Gentiana tianshanica</i>	Tienshan Gentian	----
Himalaya	<i>himalaica</i>	<i>Arabis caucasica</i>	Garden Arabis	----
	<i>himalayensis</i>	<i>Lilium pyrenaicum</i>	Pyrenean Lily	----
	<i>himalayanus</i>	<i>Plantago himalaica</i>	Himalayan Plantain	Khil Chakarpo (L)
		<i>Ermania himalayensis</i>	----	----
		<i>Astragalus himalayanus</i>	Himalayan Milk-Vetch	----
	<i>himalaicus</i>	<i>Eremurus himalaicus</i>	Fox tail Lily / Desert Candle	----
Nilgiri	<i>neelgherrensis</i>	<i>Arcyosperma sneelgherrensis</i>	----	Bulun (K)
		c. Habitat		
Aquatic	<i>aquatica</i>	<i>Ipomoea aquatica</i>	Railway creeper	Nali (D)
Sea Shores	<i>maritime /</i> <i>maritimum</i>	<i>Crambe maritima</i>	Sea Kale	----
		<i>Eryngium maritimum</i>	Sea Holly	----

Taxonomic Characterisation of Flowering Plant Species- Vir Jee

Character/ Choice	Specific epithet	Scientific Name	English name	Vernacular Name/s
Terrestrial	<i>terrestris</i>	<i>Tribulus terrestris</i>	Land Celrops,	Pakhadi (D); Mitcher Kaind (K)
Amphibious	<i>amphibium</i>	<i>Polygonum amphibium</i>	Knot weed	Rumach (K)
Swamps	<i>palustris</i>	<i>Caltha palustris</i>	Marsh Marigold	Guttal (D)
Lakes/Ponds	<i>lacustris</i>	<i>Scirps lacustris</i>	Club rush	----
Mountains	<i>montana /</i> <i>montanum</i>	<i>Clematis montana</i> <i>Baliospermum montanum</i>	Mountain Clematis ----	Chandha (D) Danti (D)
Rocks	<i>rupestris</i>	<i>Viola rupestris</i>	Teesdale Violet	----
Woods	<i>sylvestris</i>	<i>Malva sylvestris</i>	Common Mallow	----
Common/ Waste Places	<i>vulgare</i>	<i>Marrubium vulgare</i>	Hore Hound	Trouper, Gandhsui (K)
Deserts	<i>desertii</i>	<i>Agave desertii</i>	----	----
Cultivated fields	<i>sativus</i>	<i>Crocus sativus</i>	Saffron/Zafron	Koung (K)
	<i>sativa</i>	<i>Oryza sativa</i>	Paddy	Munjie (D), Dhani (K)
	<i>sativum</i>	<i>Allium sativum</i>	Garlic	Thoam (D), Ruhan (K)
Field edges	<i>arvensis</i>	<i>Convolvulus arvensis</i>	Field bind weed	Hiran Padi (D); Hiranghe /Thurae Posh(K); Teiktelkma (L)
Under-ground	<i>hypogea</i>	<i>Arachis hypogea</i>	Ground nut	Dodiyan (D); Jalgoz (K)
d. Habit / Form				
Robust	<i>robusta</i>	<i>Shorea robusta</i>	Sal	Sal (D)
Woody	<i>arboreum</i>	<i>Rhododendron arboreum</i>	Rose tree	Burau (D), Chaunh (K)
Grand	<i>grandis</i>	<i>Tectona grandis</i>	Teak	Sagaun (D)
Erect	<i>erecta</i>	<i>Tagetes erecta</i>	Big Marigold	Gutta (D); Jafir Posh (K)
Minute /	<i>minutissima</i>	<i>Primula minutissima</i>	Minute Primula	----
Small	<i>minima</i>	<i>Anagallis minima</i>	Chaffweed	----
Creeping	<i>repens</i>	<i>Trifolium repens</i>	Dutch clover	Batak Nuer (K)
Prostrate	<i>prostrata</i>	<i>Euphorbia prostrata</i>	Prostrate spurge	Suhidudli (D)
Climbing	<i>vinifera</i>	<i>Vitis vinifera</i>	Grape vine	Dachh (K); Daakh (D)
e. Leaf				
Small	<i>microphylla</i>	<i>Pilea microphylla</i>	Artillery Plant	----
Large	<i>macrophylla</i>	<i>Achillea macrophylla</i>	Sneeze wort	----
Pinnate	<i>pinnata</i>	<i>Azolla pinnata</i>	Water fern	Lal Kandori (D)
Palmette	<i>palmata</i>	<i>Ipomoea palmata</i>	Railway creeper;	Ishki Paicha (D)
Narrow	<i>angustata</i>	<i>Typha angustata</i>	Lesser Indian Reed mace	Dibb/ Aera (D); Paech (K)
Broad (ovate)	<i>ovata</i>	<i>Plantago ovata</i>	Plantain	Ismagul (K)
Dissected	<i>dissectum</i>	<i>Taraxacum dissectum</i>	Cut leaved	----
Cylindrical	<i>cylindrica</i>	<i>Sansevieria cylindrica</i>	Dandelion	----
Round	<i>rotundifolium</i>	<i>Geranium rotundifolium</i>	Spear Sansevieria /Rhino Horn	----
			Round leaved	----
			cranesbill	----
Lanceolate	<i>lanceolata</i>	<i>Plantago lanceolata</i>	Rib wart Plantain	Gu-li (K)
Cordate	<i>cordata /</i> <i>caudatus</i>	<i>Swertia cordata</i> <i>Amaranthus caudatus</i>	Charaita	Charaita (D)
			Amaranth	Leisi (K), Dorusoil (D)
Filiform	<i>filiformis</i>	<i>Juncus filiformis</i>	Thread Brush	----
Glabrous	<i>glabra</i>	<i>Glycyrrhia glabra</i>	Liquorice	Malhati (D), Shanghir (K)
Pubescent	<i>pubescens</i>	<i>Brachyactis pubescens</i>	----	Tsathi (K)
Tomentose	<i>tomentosa</i>	<i>Waldheimia tomentosa</i>	----	Solocarpo/Ma kungla (L)
Hairy	<i>hispidum</i>	<i>Onosma hispidum</i>	Golden drop	Deemok (L)
Spiny	<i>spinosa</i>	<i>Capparis spinosa</i>	Caperbush	Kalbada (D), Kapra (L)
Variegate	<i>variegata</i>	<i>Bauhinia variegata</i>	Variegated Bauhinia / Mountain ebony	Katroad (D)
Opposite	<i>oppositifolia</i>	<i>Colebrookea oppositifolia</i>	----	Chiti suhali (D)
Perforated	<i>perforatum</i>	<i>Hypericum perforatum</i>	Common St. John's wart	Basantlu (D); Basant (K)

Taxonomic Characterisation of Flowering Plant Species- Vir Jee

Character/ Choice	Specific epithet	Scientific Name	English name	Vernacular Name/s
f. Flower				
Large	<i>grandiflora</i>	<i>Magnolia grandiflora</i>	Bull bay/Great Laurel	Baraf Champa (D)
Elegant	<i>elegans</i>	<i>Zinnia elegans</i>	Youth & old age plant	----
Fragrant	<i>fragrans</i>	<i>Myristic fragrans</i>	Nutmeg	Japhal (D)
Odorous	<i>odorata</i>	<i>Viola odorata</i>	Sweet violet	Bunafsha (K)
Foetid	<i>foetidus</i>	<i>Helleborus foetidus</i>	Stinking Hellebore	----
Aromatic	<i>aromaticum</i>	<i>Syzygium aromaticum</i>	Clove	Raung (K)
Globose	<i>globosa</i>	<i>Gompheraea globosa</i>	Bachelor's button	Gultam (D), Maharaz Posh (K)
Stellate	<i>stellata</i>	<i>Tulipa stellata</i>	Tulip	Maghuna (D)
White	<i>alba</i>	<i>Rosa alba</i>	Indian white rose	Safed Gulab (K)
Rosy	<i>roseus</i>	<i>Catharanthus roseus</i>	Periwinkle	Sada suhagan (D)
Violet	<i>violaceum</i>	<i>Aconitum violaceum</i>	Aconite	Mori, Mohand (K)
Purple	<i>purpureus</i>	<i>Crocus purpureus</i>	Purple crocus	----
Golden	<i>aureus</i>	<i>Epipremnum aureus</i>	Devils Ivy/ Golden Pothos	----
Yellow				
g. Fruit				
Large	<i>maxima</i>	<i>Cucurbita maxima</i>	Pumpkin	Parim Al (K)
Cylindrical	<i>cylindrica</i>	<i>Luffa cylindrica</i>	Vegetable Sponge	Tori (D)
Black	<i>niger</i> /	<i>Hyoscyamus niger</i>	Henbane	Gayal Matang (L), Bazir Bhang (K)
	<i>nigrum</i>	<i>Solanum nigrum</i>	Black night shade	Kambiae (K), Kayankothi (D)
Hollow	<i>fistulosa</i>	<i>Cassia fistulosa</i>	Indian laburnum / Golden Shower	Krangal (D), Faloose (K)
4-Seeded	<i>tetrasperma</i>	<i>Vicia tetrasperma</i>	Smooth Tare	----
h. Religious/Sacred				
	<i>religiosa</i>	<i>Ficus religiosa</i>	Peepal	Pipal (D)
	<i>sancum</i>	<i>Ocimum sanctum</i>	Holy Basil	Tulsi (D)
	<i>sacra</i>	<i>Saussurea sacra</i>	Sacred Saussurea	Juge Padsha (K)
i. Commemorational				
Hooker	<i>hookeriana</i>	<i>Iris hookeriana</i>	Hooker's blue	Tagma (L)
Benthem	<i>benthami</i>	<i>Arnebia benthami</i>	Rattanjot	Gao-zaban (K)
Roxburgh	<i>roxburghii</i>	<i>Putranjiva roxburghii</i>	Child life tree	Jeopota (D)
Wallich	<i>wallichii</i>	<i>Cirsium wallichii</i>	Horse Thistle	Bagoul (D)
	<i>wallichiana</i>	<i>Ulmus wallichiana</i>	Himalayan elm	Manu (D), Bran (K)
Royle	<i>roylei</i>	<i>Delphinium roylei</i>	Larkspur	Mori (K), Nirbisi (D)
Anderson	<i>andersonii</i>	<i>Thlaspi andersonii</i>	Pennycress	----
Duthie	<i>duthiei</i>	<i>Kobresia duthiei</i>	---	----
Aitchinson	<i>aitchisonii</i>	<i>Epilobium aitchisonii</i>	Willow Herb	----
De-Candolle	<i>candolii</i> / <i>candolleanus</i>	<i>Bupleurum candolii</i> / <i>Astragalus candolleanus</i>	Hares Ear	Jadh-jari (D)
Drummond	<i>drummondii</i>	<i>Phlox drummondii</i>	Milk-Vetch	Mouch kanda (D)
Thomson	<i>thomsonii</i>	<i>Swertia thomsonii</i>	Pride of Texas	Taara phool (D)
